KEY PROJECTS

Lucky Duckies | USC, CSCI-491A Class

August 2025 - Present

QA Lead

Involved in leading the QA Team, consisting of 2 people. I am responsible for organizing, debugging, and testing builds weekly. I communicate with the Engineers, Artists, and Designers on what issues my coworker and I encounter, and categorize these issues based on severity. This project follows Agile.

Pong | Independent Project

August 2025 - Present

Programmer / Developer

Developing a Pong game in Eclipse, utilizing the graphics library and JFrame. This will display an in-game score at the top of the screen and will be a 2-player game.

SPOTIFY-INSPIRED WEB APPLICATION | USC, CSCI-201 Class

October 2024-December 2024

Back-end Development

Involved in the back-end development, developing the user database in the engine, MySQL Workshop, and linking it to Eclipse's code with the assistance of Supabase. The app allows logged-in users to connect to private listening lobbies and rate songs.

GAMU-DAMA | USC, CTIN-489 Class

September 2023 – December 2023

Character Designer/ Pixel Animator

Leveraged the game engine, Unity to co-create a unique game. Drew and animated all the characters' attacks, movements, and idle animation in the online program, Piskel.
